### WATER SAFETY!

If we have said it once we should say it twice. Water safety near pools & spas is an absolute must.

In recent news Randall Cunningham, an ordained minister and who was also inducted into the Eagles Hall of Fame last year, 2 year old son Christian accidentally drowned in their hot tub located in their backyard.

When most of us are enjoying time at the pool or beach, injuries aren't the first thing on our minds. Yet, drownings are the leading cause of injury death for young children ages 1 to 4, and three children die every day as a result of drowning.

Children who drown in residential pools and spas have been last seen inside their homes, been gone for less than five minutes and were in the care of either or both parents at the time.

Parents can play a key role in protecting the children they love from drowning.

### Prevention Tips

**Fence it off.** Install a four-sided isolation fence, with self-closing and self-latching gates, around backyard swimming pools. This can help keep children away from the area when a parent cannot supervise them. Pool fences should completely separate the house and play area from the pool.

**Make life jackets a "must."** Make sure kids wear life jackets in and around natural bodies of water, such as lakes or the ocean, even if they know how to swim.

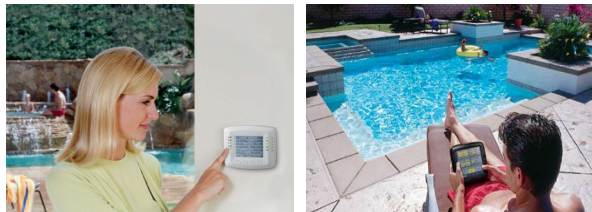

**Learn CPR.** Learn cardiopulmonary resuscitation (CPR) and get recertified every two years. CPR can help a child stay alive with little or no brain damage.

**Be on the look out.** Supervise young children at all times around bathtubs, swimming pools, and natural bodies of water. Adults watching kids near water should avoid distracting activities like playing cards, reading books, or talking on the phone.

# Products to Consider

There are several products on the market that can make your swimming pool and spa experience much more enjoyable. Below are just a few products we carry that you might want to consider reviewing and incorporating into your equipment. Call today to discuss Installation and pricing.

## Pentair IntelliTouch Pool and Spa Control Systems

An IntelliTouch® control system takes the work and worry out of scheduling and operating pool and spa heating, filtration and cleaning cycles. It also gives you one-touch control over additional heaters, valves, pool lights, landscape lights, water features and more. At the same time, IntelliTouch makes sure all your equipment operates at peak efficiency for minimum energy usage and cost. It even helps protect your equipment investment. It even helps protect your equipment investment. IntelliTouch senses conditions that could hamper operation and alerts you to these situations or takes automatic corrective action.

## Nature 2 Spa Mineral Sanitizer

Nature<sup>2</sup> Spa uses patented mineral-bed technology to destroy bacteria. Its revolutionary process significantly improves the look, feel and smell of your spa water, by dramatically reducing chlorine and bromine requirements. If used with MPS, the most recommended spa oxidant, Nature<sup>2</sup> Spa becomes a complete spa sanitizing system - the only non-chlorine spa sanitizing option available. And managing your spa is easier than ever;

Nature<sup>2</sup> Spa slips into your spa filter and lasts up to four months.

### Benefits

- Simply drops right into your filter
- Works with your existing filtration system
- Hassle-free maintenance
- Leaves water softer and clearer

### Product Specifications

- Available for spas: Up to 500 gals
- Works with all spa flow rates
- Cartridge lasts 4 months

## Pentair WhisperFlo® High Performance Pump

We call it the WhisperFlo® pump for good reason. This innovative hydraulic design moves water more efficiently and more quietly than competitive pumps. Under typical operating conditions, WhisperFlo offers the highest water flow of any high performance pump—yet with the lowest electrical consumption. And, WhisperFlo is designed to be a tireless work-horse. Its engineered thermoplastic housing withstands extreme heat and resists corrosion. The commercial grade motor frame has a rustproof, stainless steel motor shaft and sealed bearings that never need lubrication. Engineered to provide optimum performance in any size pool or pool and spa combination, WhisperFlo is built to last a lifetime, an as a result, has become the industry's top seller for years.

## Nature 2 Express In-Ground Pool

Nature<sup>2</sup> allows pool owners to bring all the benefits of mineral technology to their existing pool with a quick, do-it-yourself installation. The unit attaches to the plastic plumbing of most in-ground and aboveground pool systems.

During the regular pool filtration cycle, water flows through the Nature<sup>2</sup> Express cartridge, where a combination of silver and copper minerals destroy bacteria. This process significantly reduces the need for large amounts of chlorine, limiting the potential for eye irritation and unpleasant odors.

- Available for pools: Up to 25,000 gallons
- Cartridge lasts 6 months
- 1-year limited warranty

## Nature 2 Professional "G" In-Ground Pool

The Nature<sup>2</sup> Professional G mineral sanitizer for in-ground pools delivers improved water clarity, and clean, safe water without the harsh effects of traditional chlorine-based treatments. Working with your pool filtration system, the Professional G uses elemental minerals that work with a small amount of chlorine to inhibit bacteria

growth and eliminate contaminants. Minerals make the water noticeably softer, and less chlorine means no more red-eye, dry skin or foul odors. With Nature<sup>2</sup> Professional G you get water that looks, feels and smells noticeably cleaner.

- Available for pools: 10,000 - 25,000 gallons 25,000 - 35,000 gallons 35,000 - 45,000 gallons
- Cartridge lasts 6 months
- 5-year limited warranty

## Refreshing Poolside Treat

Frozen fruit on a stick makes an easy and healthful snack. Each 34-calorie pop provides almost a full serving of fruit! In a blender, combine 1 cup guava nectar, pear nectar or orange juice with 1 cup pineapple juice and 1 cup fresh pineapple chunks. Cover and blend until smooth. Divide 1 cup coarsely chopped or sliced fresh fruit (such as strawberries, kiwifruit, papaya

or melon) among 12 freezer-pop molds or 4- to 6-ounce paper cups. Pour blended mixture over fruit. Add wood sticks, and cover the molds. Or cover each cup with foil; make a small hole in the foil with a knife, and insert sticks into cups through holes where the foil will hold the sticks upright. Freeze 4 hours or until the fruit pops are firm.
